Hot on the heels of the SmartSearch 3.1 release, Square 9 Softworks shakes up office automation again with its GlobalSearch-powered app for Apple's iPad

NEW HAVEN, CONN., March 21, 2011 — Square 9 Softworks, a leading developer of innovative, business-centric software solutions, announced today the introduction of its new Square 9 GlobalSearch App for the Apple® iPad™.

Offering mobile convenience and efficiency for users of SmartSearch, the company's award-winning document management solution, the new app is more than just a Web page viewed through Apple's iPad. The Square 9 GlobalSearch App is a native iOS app which allows users to run remote searches for documents stored within SmartSearch, filter the Archives to be searched, print and e-mail records and even perform user-initiated workflow actions like document approvals. The new app also features a convenient hyperlink capability.

"The Square 9 GlobalSearch App for Apple's popular iPad extends the power of SmartSearch to mobile platforms," said Stephen Young, president and CEO of Square 9 Softworks. "We are witnessing a steadily growing mobile workforce that is relying increasingly on tablets and touch-screen technology to conduct their day-to-day business. Now, with the Square 9 GlobalSearch App, our user community can rapidly locate and act on information within SmartSearch whenever and wherever they choose."

At the heart of the Square 9 GlobalSearch App is *GlobalSearch*, a technology that lets users run quick and easy "Google-like" searches for documents. It allows users to search for records across an entire database or only on select Archives to limit results. Regardless of what is selected, the app can look across an entire SmartSearch database at high speed with the results categorized by Archive. Square 9 Softworks will introduce *GlobalSearch* into its core product offering later in 2011.

Built on Apple's iOS mobile operating system, *GlobalSearch* gives users the immediate, fluid interface experience provided by most other iOS apps. *GlobalSearch* users can use gestures such as swipe, pinch and reverse pinch to manipulate documents, and they can switch documents from portrait to landscape mode by rotating the iPad in three dimensions.

ABOUT SQUARE 9 SOFTWARES

Square 9 Softworks is a leading developer of innovative, business-centric software solutions including the award-winning SmartSearch Content Management Suite. Dedicated to making content management available to organizations of all sizes, Square 9 Softworks designs solutions built on open architecture and cutting-edge technologies that drive efficiency and productivity across all business applications.

Through decades of experience with content management technologies in business enterprises of all kinds, Square 9 Softworks has acquired a thorough understanding of document-driven business processes.
