## Square 9 Softworks introduces Web XChange into SmartSearch, extending the power of content management beyond the confines of traditional networks

NEW HAVEN, CONN., June 22, 2009 — Square 9 Softworks, a leading developer of innovative, business-centric software solutions, announced today the introduction of Web XChange into its award-winning SmartSearch Content Management Suite.

SmartSearch Web XChange extends the reach of SmartSearch beyond traditional LAN, WAN and VPN environments by delivering data and documents through a standard Web browser. Remote or non-connected users can now utilize Web XChange to search for documents within SmartSearch from their home, remote office or Web kiosk. Because SmartSearch Web XChange is platform independent, information access is even available to Mac clients using Safari, and any other platform using Internet Explorer, Mozilla FireFox or Google Chrome.

"Web XChange is an important step in the evolution of SmartSearch," said Stephen Young, president and CEO of Square 9 Softworks. "It extends SmartSearch beyond the confines of customers' networks and provides an integration tool kit that ties SmartSearch into their key business applications. Web XChange can multiply efficiency and productivity exponentially in accounts payable, customer service, field sales and many other applications, delivering a high return for our customers' technology investment."

With SmartSearch Web XChange, remote access is as simple as navigating to a Web page. Documents are rendered to PDF and displayed with any PDF browser plug-in. Standard SmartSearch security is automatically applied with Web views logged in the SmartSearch Audit Trail.

SmartSearch Web XChange uses the convenience of a standard PDF viewer, eliminating the need for proprietary plugs-ins or ActiveX Controls to be installed. Users can view, print or e-mail documents from within the PDF viewer. Secure access is available with 128-bit encrypted document delivery through Secure Socket Layer (SSL) technology. Web XChange can be load balanced across multiple Web servers.

SmartSearch Web XChange goes beyond standard Web-based document delivery by providing powerful tools for integrating SmartSearch within users' Web sites or with other Web-enabled applications. Leveraging the power of SmartSearch's .NET architecture, administrators or developers can call functions from within SmartSearch through our Web Services Library; they can:

- Insert links into their Web-based applications for quick, easy document access.
- Run document searches directly from their line-of-business applications.
- Embed secure document access into their customer service portals.
- Utilize a variety of Rich Web Service-based API functions.

## ABOUT SQUARE 9 SOFTWARES

Square 9 Softworks is a leading developer of innovative, business-centric software solutions including the award-winning SmartSearch Content Management Suite. Dedicated to making content management available to organizations of all sizes, Square 9 Softworks designs solutions built on open architecture and cutting-edge technologies that drive efficiency and productivity across all business applications.

Through decades of experience with content management technologies in business enterprises of all kinds, Square 9 Softworks has acquired a thorough understanding of document-driven business processes. Intensely customer-focused and highly responsive, the company delivers effective, value-driven solutions and has achieved a reputation for excellence in meeting the rapidly evolving needs of its customers.

Square 9 Softworks distributes its solutions exclusively through a network of highly skilled channel partners from its corporate office in New Haven, Connecticut. For further information, visit [www.square-9.com](http://www.square-9.com)

Among many diverse uses, some common applications of Web XChange include:

- Accounts Payable – Remote or branch offices can access and approve vendor invoices via a convenient Web-based interface.
- Customer Service – Customers or key vendors can securely access documents within SmartSearch by integrating Web XChange with an existing customer service portal.
- Legal – Attorneys can access filed transcripts, depositions or discovery documents from within the courthouse.
- Public Access – Municipalities can make public records available through direct integration with the municipal Web site.
- Sales – Field Sales personnel can view orders, invoices or status changes from wherever they may be working.

The SmartSearch Content Management Suite is a feature-rich solution suite that organizations of all sizes use to manage their documents electronically, driving efficiency and productivity across all business processes. Built for content management on the .NET platform using an open architecture design, SmartSearch is a scalable, value-driven solution that is easy to use, learn and support. From small businesses to the Fortune 500, organizations that rely on document-intensive processes use SmartSearch to manage documents electronically and streamline their workflow as they eliminate inefficient paper-based filing systems.
