## **SmartSearch 3.0 with new Work XChange option empowers users to fully automate their business processes and achieve greater efficiency and productivity**

NEW HAVEN, CONN., March 23, 2010 — Square 9 Softworks, a leading developer of innovative, business-centric software solutions, announced today the release of Version 3.0 of its award-winning SmartSearch Content Management Suite.

"SmartSearch 3.0 represents an exciting new direction for SmartSearch," said Stephen Young, president and CEO of Square 9 Softworks. "SmartSearch 3.0 with the new Work XChange option allows our customers to build on the core strengths of SmartSearch as a content repository, while empowering them to expand fully into business process automation. With expanded automation, the potential for our customers to realize high rates of return on their content management investment is virtually limitless. Our Professional Services Group is working with our partners and customers to help them identify areas for process improvement with high potential returns."

The cornerstone of SmartSearch 3.0 is Work XChange, a powerful yet easy-to-use new document workflow component that enables users to automate their key business processes. This optional module incorporates the same graphical drag-and-drop design interface as SmartSearch's standard Capture Workflow feature. With Work XChange, SmartSearch 3.0 features conditional Document Routing, Notifications & Escalations and Metadata Updates on documents within the database. Work XChange features both user-initiated and automated workflows to enable process automation.

In keeping with Square 9 Softworks' longstanding practice, SmartSearch 3.0 was developed with a strong emphasis on customer-requested enhancements. As a result, the core product includes enhancements such as Field Ordering, Column Sizing, Document Merging and the ability to email PDF files with an index field as a filename. Additional highlights include a range of tools for enhancing the search capabilities within SmartSearch, support for Windows 7 and support for 64-bit architecture on both client and server operating systems.

SmartSearch is now available in two editions. The Professional Edition, with its modular design, offers maximum flexibility in pricing and configuration for organizations of any size. Users select only the tools they need for specific business applications. The Corporate Edition is a comprehensive solution that offers the full spectrum of SmartSearch's award-winning capabilities and represents a balance of value and functionality.

## ABOUT SQUARE 9 SOFTWARES

Square 9 Softworks is a leading developer of innovative, business-centric software solutions including the award-winning SmartSearch Content Management Suite. Dedicated to making content management available to organizations of all sizes, Square 9 Softworks designs solutions built on open architecture and cutting-edge technologies that drive efficiency and productivity across all business applications.

Through decades of experience with content management technologies in business enterprises of all kinds, Square 9 Softworks has acquired a thorough understanding of document-driven business processes. Intensely customer-focused and highly responsive, the company delivers effective, value-driven solutions and has achieved a reputation for excellence in meeting the rapidly evolving needs of its customers.

Square 9 Softworks distributes its solutions exclusively through a network of highly skilled channel partners from its corporate office in New Haven, Connecticut. For further information, visit:

In December 2009, following extensive evaluation by Buyers Laboratory Inc. (BLI), the world's leading independent evaluator of document imaging products and solutions, SmartSearch 2.3 earned a five-star rating—BLI's highest. SmartSearch was also honored with the organization's prestigious Fall 2009 "Pick" Award in the Outstanding Workgroup Document Management Solution category.

The SmartSearch Content Management Suite is a feature-rich solution suite that organizations of all sizes use to manage their documents electronically, driving efficiency and productivity across all business processes. Built for content management on the .NET platform using an open architecture design, SmartSearch is a scalable, value-driven solution that is easy to use, learn and support. From small businesses to the Fortune 500, organizations that rely on document-intensive processes use SmartSearch to manage documents electronically and streamline their workflow as they eliminate inefficient paper-based filing systems.

For further information about the SmartSearch Content Management Suite, contact Square 9 Softworks at (203) 789-0889 or visit [www.square-9.com](http://www.square-9.com).
