

DISCOVERY ATTENDER®

FOR EXCHANGE

Discovery Attender for Exchange is designed to assist companies and law firms in locating electronically stored information (ESI). This program will help you retrieve responsive data in PST files, common files and live Exchange mail stores. Whether you are involved in a discovery request, performing an internal audit or trying to reduce liabilities, Discovery Attender will help you quickly find and produce critical information.

Technical Features

Free Trials available at www.sherpasoftware.com

General Features

- Produce data in response to subpoenas, requests from inside counsel or court orders
- Manage discovery needs in compliance with the new amendments to the Rules of Civil Procedures
- Secure potential evidence for litigation holds
- Robust logging for audit trail and chain of custody reporting
- Transparent rule creation and searching functionality
- Common interface for search creation, progress monitoring and results review
- Fast and secure system to execute document discovery requests
- Small footprint with an easy to use interface

Search Features

- Wizard interface for intuitive search setup
- Locate messages and attachments in PST files and live Microsoft Exchange mail stores
- Examine files stored on servers or local drives accessible by Windows network shares
- Searches most common file formats including .doc, .xls, .pdf, .zip, etc.
- Customizable search conditions includes keywords, dates, file type, name and size
- Keyword criteria can include lists, multi-word phrases, proximity searching, Boolean logic and wildcards
- Powerful searching of email including subject, body, addresses, dates, and attachments
- Organizes searches and results into centrally accessible projects

Data Reporting and Retrieval

- User-friendly interface for management of result items
- Numerous options for exporting responsive items to PSTs or files
- De-duplication of results based on user-selected criteria
- Annotation of individual result items

- Tools to label and mark result items for ease of review
- Filter results by location, file type or user customized fields
- Key properties of message and file results stored locally
- Summary and detailed reports of the result items including keyword snippets
- Fully accessible back-end databases for custom reporting
- Portable projects for efficient organization of workload

Specifications

System Requirements

- Windows 2000 or higher
- Approximately 30 MB HD space needed
- Additional hard drive space may be required for large searches
- 400 MHz or higher CPU
- Outlook 98 or higher (if installed on a server not running Exchange)
- .Net Framework Version 1.1 (installed if not present)
- Local administrator rights for the installation
- Permissions to the targeted mail stores and network shares

Architecture

- Non-intrusive, user-friendly installation
- Works with Exchange 5.5, 2000, 2003 and 2007
- Works with Outlook 98 or higher
- Operates on your desktop or server
- Installed on a desktop or server, no further agents or services are needed
