

Automating the Process of Document Output

Don't just print your documents; distribute them.

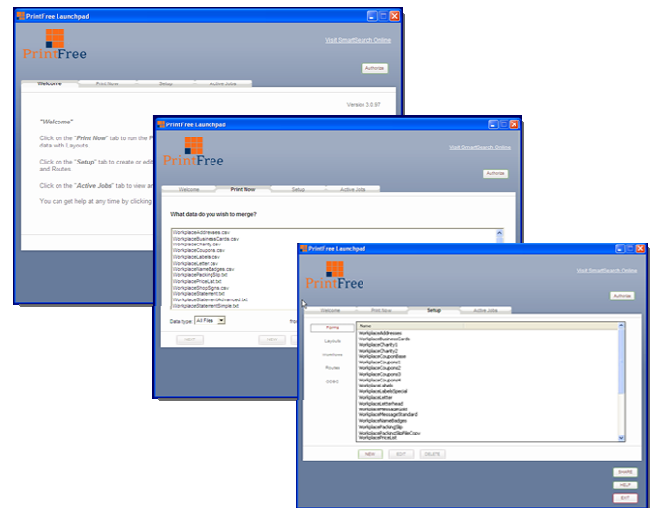

Square 9 PrintFree delivers a suite of tools for automating the design and distribution of your business documents without altering your existing network infrastructure.

Easily create transactional and promotional variable content documents through the PrintFree Designer and then print, fax, email or archive them to images as part of your own personally configured workflow.

- **Automated Email or Fax Distribution**
- **Direct Archive to SmartSearch Document Management**
- **Distributed Printing over LAN or WAN**
- **Eliminate pre-printed forms**

The Square 9 PrintFree Product Suite

Square 9 PrintFree is an easy to use Windows based application that takes unformatted data and delivers beautifully designed documents to print, email, fax or archive. Whether you are producing direct mail, transactional documents or transpromotional documents, PrintFree makes your print jobs faster, more flexible and much less expensive. Using a pre-designed template, information from virtually any source including ODBC compliant databases can be managed from document design to delivery.

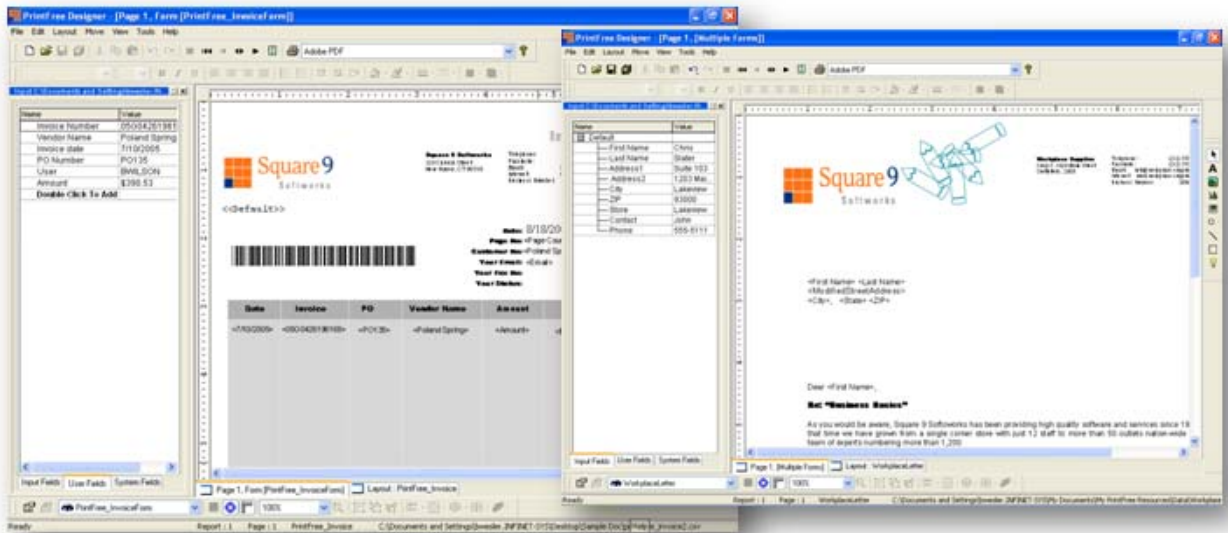

- Reduce your costs for printing by eliminating pre-printed forms and green bar paper
- Distribute documents automatically through sophisticated workflows
- Turn invoice processing into advertising opportunities with TransPromotional messages
- Personalize documents for improved customer communications
- Conditionally include graphics or text through conditions within the data.
- Easily add smart features to your documents including barcodes and charts

PrintFree is a modular program that allows users to purchase only what they need to address their document driven processes. This modular design makes PrintFree both powerful and easily affordable.

PrintFree Designer

Easily create powerful direct mail applications and eliminate pre-printed forms with this easy to use, Windows based forms design tool.

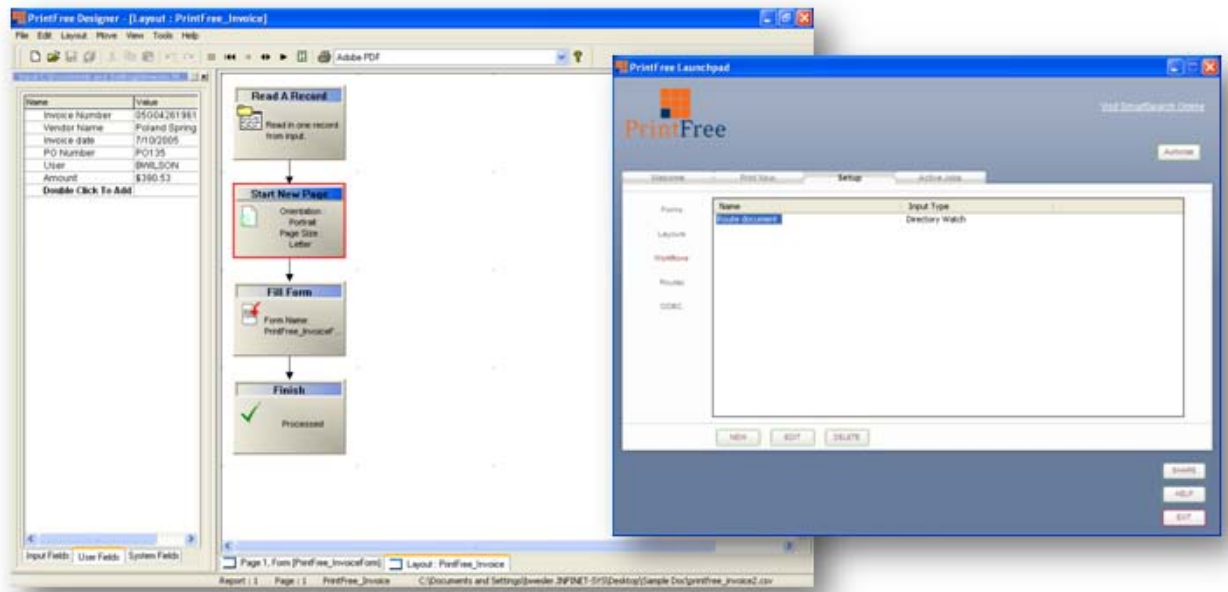

- Familiar Microsoft Word-like interface.
- Visually drag and drop data and other objects onto the page for quick and easy print application creation. WYSIWYG (What You See Is What You Get) accuracy removes any guess-work or need for special skills.
- Wizards guide you through the creation of virtually any print application including marketing letters, labels, shop signs, coupons, postcards, invoices, delivery notices and a lot more.
- Personalize your documents by applying conditional logic to form elements. For example, insert targeted messages to different audiences based on conditions in the data.
- Integrate data from simple database extracts (CSV), ODBC data sources or even host systems.
- Virtually page through the data file to check integrity and accuracy.
- Design once and output to any full color or monochrome device including ink-jet and laser printers.
- Make changes at any time without wasting paper or time.

PrintFree WorkFlow

Automate your document production workflow.

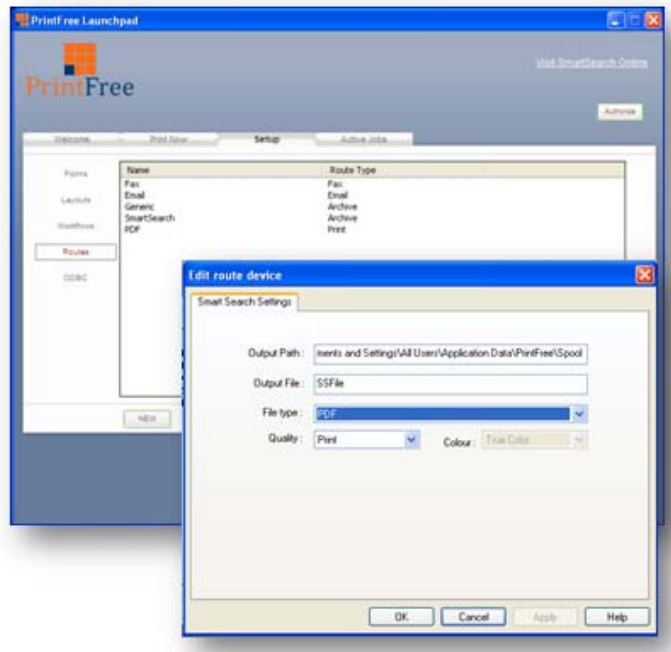

- Connect to any host via automated LPD/LPR or Hot Folder.
- Work with CSV and Line Printer files.
- Schedule automated ODBC queries.
- Apply flexible Routing to deliver documents to their point of need.
- Automatically email, fax or archive copies.
- Manage print jobs for full control.

PrintFree Image Writer

Automatically output to electronic archive.

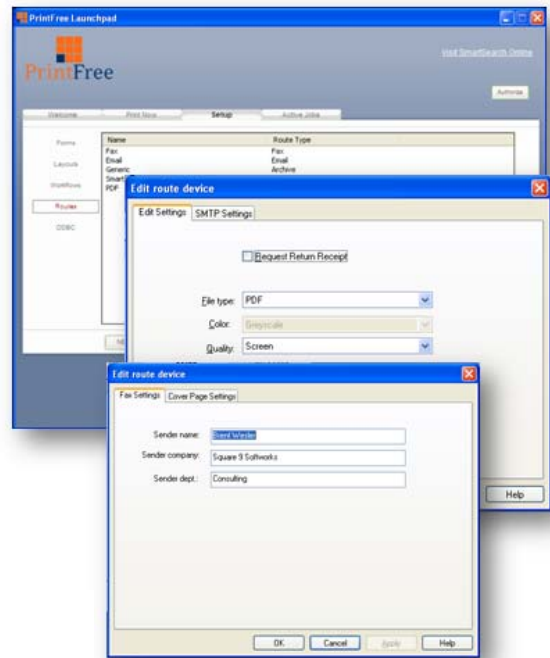

- Faithfully and accurately transform your print output to standard TIF or PDF format.
- Create Text Searchable PDF's.
- Automatically extract data to populate archived document's meta-data and indexes.
- Seamlessly archive to SmartSearch.

PrintFree Email & Fax Delivery

Deliver documents electronically.

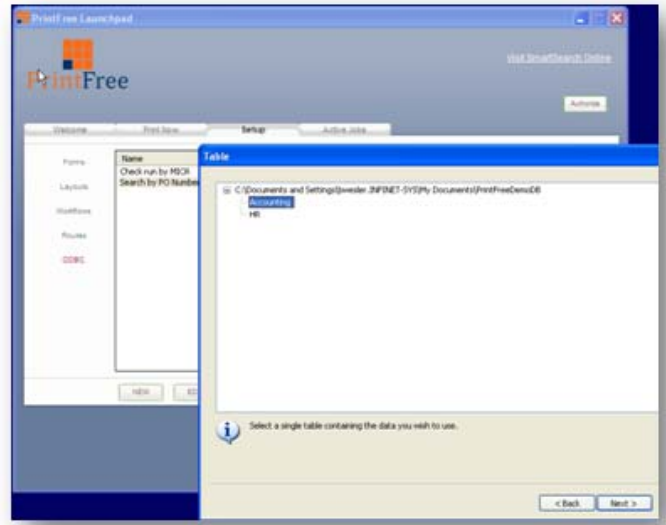

- Extract email address or fax number from the data or from table look-up.
- Save costs, time and effort by delivering documents electronically via email or fax.
- Conditionally print, email or fax according to the data.
- Create instant marketing campaigns delivered via email from your database.
- Attach data-driven document as PDF or TIFF.

PrintFree ODBC Driver

Print from any ODBC data source.

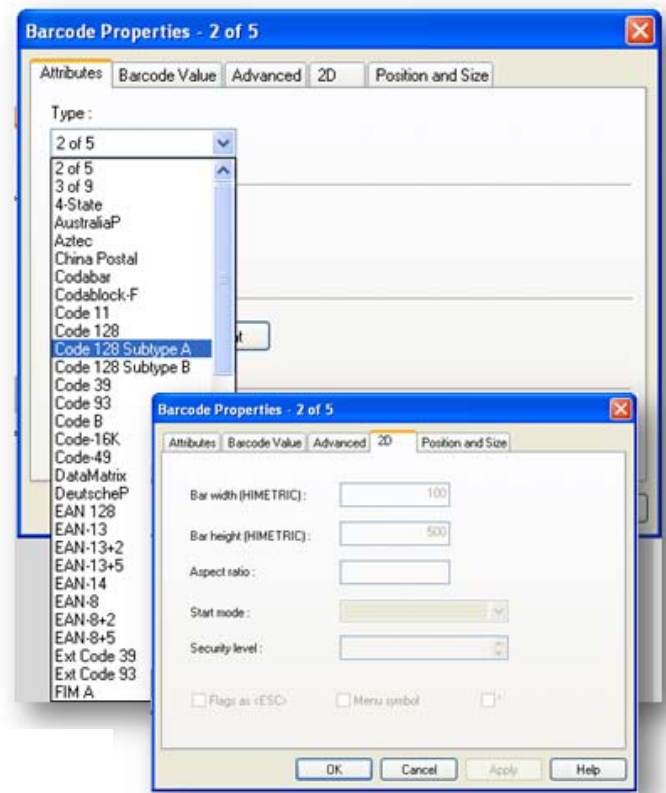

- Leverage the value of your data by using it to power your customer communication.
- Connect to and query any ODBC compliant database.
- Automate the process with the ODBC Query Scheduler.

PrintFree Bar Code Printing

Improve workflows and processes by using optical technologies.

- Print data as a machine-readable barcode for automation of processes.
- Supports all major barcode formats including Code 39, Code 39 extended and Code 128.
- Supports 2-D barcodes such as Datamatrix.
