

Simplify document centric tasks by creating highly efficient workflows that start at the touch panel of your Kyocera HyPAS enabled multi-functional printer.

The Square 9 Connector was created by Kyocera for HyPAS enabled MFP's making your equipment truly multifunctional!

Document capture can be securely stored locally

Direct document printing from the results of a search

Quickly find filed documents through new or saved searches

Advanced data extraction for automated storage and sharing

Through its integration with GlobalSearch[®] Enterprise Content Management, the Square 9 Kyocera Connector provides a real-time capture solution that improves collaboration by sharing document information with other business applications.

Anyone with access to the MFP can initiate a workflow that captures images, extracts high value data and notifies users of a pending workflow activity.

How It Works

The Square 9 Kyocera Connector provides the user-friendly tools to automate image capture, route documents, extract high value data, and create text searchable PDFs.

Capture

Documents can be captured from your multifunctional printer, scanner, email or even a watched network directory.

Optimize

Batch scanning jobs are fully optimized with document separation through OCR, Bar Code, Page Count or Blank Page Separation.

Enhance

As documents are being captured, image quality is enhanced with color drop out, auto cropping and noise removal.

Route & Release

Documents are released directly into the GlobalSearch database, either onsite or in the cloud, which are then routed to an inbox, Archive, network directory or multiple locations at the same time.

Extract

High value data is extracted with OCR or Bar Code Recognition for automating filing or to share with other business applications.

Convert

Scanned images can automatically be converted into text searchable PDFs as soon as they are captured from the Square 9 Connector.

Square 9 Connector makes your office equipment truly multifunctional. Are you ready to take the next step?
