

GlobalCapture® EIP Xerox Equipment Integration

Utilize the full capabilities of your Xerox multifuctional printer (MFP) by automating document processes directly from the touch panel

Key Features & Benefits

GlobalCapture EIP provides users with the tools to automate image capture and distribution directly from the touchscreen of your EIP enabled Xerox device.

Touchscreen Access

Advance the scanning capabilities of your EIP-enabled Xerox MFP by incorporating image enhancement, batch separation and barcode recognition capabilities - all through direct touch panel access to GlobalSearch and its powerful capture workflow utilities.

Effective OCR

Leverage GlobalCapture EIP's Optical Character Recognition to either extract high value data from your documents or to convert them into text searchable PDFs. This not only enhances document filing and retrieval, it also allows you to share the extracted data with your other business applications.

Increase Productivity

Incorporate powerful workflows into your capture process as scanned records can be routed based on your specific internal business processes. Assign document related activities to staff members in your organization including multi level review and approval processes.

GlobalCapture EIP streamlines the flow of information by triggering document processes directly from your Xerox MFP. Are you ready to take the next step?

GlobalCapture[®] EIP Xerox Equipment Integration

How it Works

Create

Create highly efficient GlobalCapture workflows that start at the touch panel of your EIP enabled Xerox MFP.

Access

Enjoy unlimited capture automation with no limitation on the number of devices connected.

Optimize

Optimize batch-scanning jobs with document separation through OCR, Barcode, Blank Page or Page Count.

Enhance

Enhance poor quality images with the ability to De-skew, De-speckle and Auto Crop captured documents as they are being captured.

Index

Extract data from documents with barcoded zones and leverage the information to name or index records automatically.

Extract

Use OCR based templates to extract high value data from images to automate your indexing processes or to share with other business applications.

Route & Release

Route and release documents directly to a GlobalSearch Inbox, Archive, to a network directory, or multiple locations simultaneously.

Convert

Automatically convert TIFF or PDF based image files into searchable PDF files when scanned from your Xerox EIP enabled MFP.
