Unleash the power of the cloud and make your office equipment the gateway for web-hosted document collaboration.

As the next generation of ECM technology, GlobalSearch C2 is a managed cloud infrastructure, extending the reach of your document management installation. From any modern browser, through your desktop or mobile device, GlobalSearch C2 keeps the flow of your business information moving.

Capture to the Cloud

Scan directly to GlobalSearch C2 through secure FTP or leverage the power of GlobalCapture to create capture workflows, automating your scan processes from the MFP.

Extend Your Access

GlobalSearch C2 provides secure access to business content through desktop or mobile devices, delivering flexibility in performance and ensuring content is safe not matter where you are.

Increase Productivity

Work with your documents faster and more easily than with hard copies. Navigate through pages, adjust orientation, edit index data, add an annotation or apply signatures in seconds.

Amazon Web Services (AWS)

GlobalSearch C2 leverages Amazon Web Services for cloud based computing to increase your productivity through efficient management of your documents.

amazon web services™

- **Store with Confidence at 99.9% Durability**
- **There When You Need It with 99.9% Availability**
- **Scalability to Store as Much Data as You Want**
- **Secure 256-bit Advanced Encryption**

Differentiators

Anywhere, Anytime Access

From any modern browser through your desktop or mobile device, GlobalSearch C2 keeps the flow of your business information moving.

Document Capture

Import any document or small batches through a drag and drop interface, or directly scan them from your copier.

Document Storage

Store critical documents with confidence based on a durability standard of 99.9%, allowing you to store as much data as you want and access it when you need it.

Editing Capabilities

Document editing capabilities include highlighting, redaction, sticky notes and even a fully ESIGN compliant tool for applying "wet signatures" with your finger or mouse.

Cloud-Based Platform

Optimized to deliver a desktop experience through the browser, C2 leverages Amazon Web Services for cloud-based computing to increase your productivity.

Security

C2 uses one of the strongest block ciphers available, ensuring your content is always secure, always backed up and always available.

Take Advantage of the Cloud with GlobalSearch C2!
