Elevate Accounting Productivity with Square 9's QuickBooks Connections

Combine bill creation and document capture into a highly efficient payable process to eliminate repetitive manual data entry while streamlining document sharing and collaboration.

QuickBill
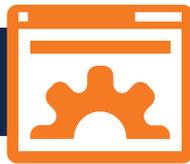

Capture an invoice or purchase order into GlobalSearch where data is extracted and pushed to QuickBooks for automatic bill or invoice creation, eliminating the need for manual data entry.

QuickScan

Information entered directly into QuickBooks is scanned to GlobalSearch and indexed automatically, greatly reducing document filing and retrieval.

QuickSync

QuickSync allows for database lookups from QuickBooks, pulling information into an accessible data source and sharing that data with GlobalSearch or other line of business applications.

QuickLinks

Access documents stored in GlobalSearch from within the QuickBooks interface, without the need to enter search criteria. QuickLinks uses the open transaction to pass the search data automatically.

Key Benefits

Fast & Efficient

With QuickBooks Connections, tasks are completed much faster than by manual indexing, as the integration eliminates the need for repetitive data entry

Greater Accuracy

Data is collected using OCR assisted automation tools such as KeyFree Indexing, which is not prone to the errors associated with manual data entry

Productivity

Accounting departments using QuickBooks Connections can process larger numbers of transactions in less time, with less resources

Scalability

Organizations have flexibility with their implementations as the main features of QuickBooks Connections - can be bundled together, or purchased as standalone products as needs arise

Key Features

✓ **Improved Functionality:** QuickBooks Connections features user triggered initiated data pushes for automatic bill creation and instant invoice matching

✓ **Assembly Bound Lists:** GlobalSearch pulls data from QuickBooks more efficiently with assembly bound lists accessing the QuickSync data source

✓ **Automatic Data Population:** Integration allows data to be entered once, automatically sharing with other business applications

✓ **Mobile Access:** Bill creation through user initiated data pushes is available from the GlobalSearch web client

✓ **Multi-Company Support:** Users can easily change which company the bill is being sent to by simply changing which database is open in QuickBooks

✓ **Compliance:** QuickBooks Connections complies with all Generally Accepting Accounting Principles (GAAP)

By linking QuickBooks with GlobalSearch, users will not only work more efficiently, but will also increase their accuracy with direct access to accounting documents.
