

Explore New Ways to Locate Your Business Information.

Content Enabled Search.

Ever wonder how you could increase productivity with immediate access to stored content? Give your business an efficiency boost with the ability to locate content in one simple click! Image XChange instantly retrieves the information you need by searching the entire GlobalSearch system to match data selected on your screen.

From the modern browser, Image XChange directly captures, extracts, and finds stored documents without the need to open GlobalSearch.

Enable more informed decision making with the powerful features of Image XChange!

Conveniently point-and-click on any word or group of words to run a search

Simply hover over an area of your screen or draw a capture box to grab content

Edit or add additional search criteria with the search prompt box

Match documents from data anywhere on the screen, including webpages and emails

Customize search options, including hot keys based on individual users needs

Quickly and easily search documents, from anywhere and from any application
