For Immediate Release**Plustek Announces New eScan A350 for GlobalSearch**

Standalone kiosk scanner streamlines document scanning and indexing for users of Square 9 Softworks' GlobalSearch Enterprise Content Management solution

NEW HAVEN, CONN., May 28, 2019 – Plustek Technology today announced the availability of the eScan A350 for GlobalSearch, another option in the new eScan A350 line of network attached document scanning kiosks. The new eScan A350 for GlobalSearch provides an integrated experience out-of-the-box with Square 9 Softworks' award-winning GlobalSearch Enterprise Content Management solution.

The eScan for GlobalSearch A350 allows users to build destination buttons that scan documents directly to the GlobalSearch database archives. The buttons appear on the home screen of the A350 touch panel display, and each can be configured with its own unique scan settings. Users can choose to enter index data using the touch panel or save the document unindexed and use Square 9's point and click OCR-assisted KeyFree Indexing tool from their desktop.

"The Plustek eScan A350 for GlobalSearch represents a shift in the scanning industry to a much more integrated experience," said Michael Frattini, Senior Vice President, Operations at Square 9. "Whether used as a kiosk or on the desktop, GlobalSearch users will experience significant productivity gains by leveraging the Plustek eScan A350 for their scanning needs."

The new eScan for GlobalSearch A350 connects via ethernet or Wi-Fi and provides a completely integrated experience built into the large 7" touch panel display. Additional functionality includes long paper mode to scan pages up to 200" in length, ultrasonic misfeed detection to reduce data loss, and the ability to process an unlimited number of scanning jobs. No PC or additional software is needed. The new scanner can be easily integrated with both on premise configurations of GlobalSearch as well as Square 9's GlobalSearch C2 cloud hosted solution.

"With state-of-the-art image quality, paper handling, and performance, Square 9 GlobalSearch users will find that the A350 family are the most productive document scanners available today," said Johnson Yang VP of Plustek Americas region. "Both enterprises and small businesses will benefit from these scanners. They are easier to setup and use than traditional document scanners or MFPs," added Johnson.

The Plustek eScan family of scanners includes the eScan A180, A250, Essential A350, the Buyers Labs award-winning Enterprise SharePoint A350, and eScan Square 9 for GlobalSearch. Scanners are available in North America through [online resellers](#), Value-Added Resellers, and Value-Added Distributors including NewWave Technology, IngramMicro and AB Distributing. For detailed product information, please visit Plustek.com.
