

Automotive Essentials

Managing Repair Orders and Deal Jackets in a Whole New Way

Eliminate the Storage of Paper-Based Repair Orders and Deal Jackets Forever

Automotive dealerships commonly struggle with managing an abundance of paper documents for Repair Orders and Deal Jackets. These documents typically contain multiple files, are catalogued on premise for future reference, and must be retained for both compliance and for customer inquiries.

Automotive Essentials is a dynamic cloud-based solution designed specifically for the automotive sales and repair industry. Automotive Essentials streamlines the most common document-intensive processes by effortlessly capturing, storing and retrieving the growing volume of paper records in dealerships and storing it in a secure cloud repository.

Simplify the process of scanning and filing of Repair Orders and Deal Jackets into a secured cloud repository

Easily access estimates, part lists and more in seconds to satisfy MVD inquires or to protect against consumer protection inquiries

Secure approved & denied Customer Credit Applications and Personally Identifiable Information they contain

Manage records retention policies as outlined by both State agencies and the United States Department of Transportation

Easily transform printed information from dealer management systems: Reynolds & Reynolds, CDK Global, and more

Best of all, in addition to Repair Orders and Deal Jackets, Automotive Essentials can also be expanded to manage other business records like Human Resource files or Vendor Payables.
