- **Get Connected**
- **Extend Your Access**
- **Keep Business Moving**

GlobalSearch eliminates risks in Accounts Receivable processing, boosting company-wide productivity and streamlining order distribution.

Accounts Receivable Automation with GlobalSearch ECM

Challenges

- ✖ Slow, manual data entry of orders into the system
- ✖ Difficulty producing signed proof of delivery receipts
- ✖ Delayed cash receipts for open invoices
- ✖ Improper document maintenance & records retention

Solutions

- ✔ Reduce order processing costs through data capture
- ✔ Provide quick, easy access to POD information
- ✔ Reduce Days Sales Outstanding
- ✔ Increase levels of cash flow through prompt payments
- ✔ Ensure records retention compliance

The key to receiving customer payments quickly is being able to prove you delivered what was ordered and when it was received by. AR Automation with GlobalSearch streamlines this process.

Key Benefits

Capture
GlobalSearch allows users to quickly batch scan, email, drag and drop or use a capture workflow to import AR documents directly into document management software.

Distribution
Once a sales order enters the system, it can be automatically routed to the appropriate departments for approval and processing.

Customer Service
Users can immediately access all customer related documentation like account information, purchase orders and invoices outstanding.

Tracking
Easily track a customer's credit and payment terms by instantly pulling up all documents sharing that client's customer number.
